Postponement of changes to Financial Management 3 (FM303)

In order to facilitate a more streamline roll-out of the finance module changes, the Faculty members of the IMM GSM have taken a decision to implement a phase-out process for the **Financial Management 3 (FM303)** module for **first semester 2015**. The previous Financial Management 3 module material will thus be used for first semester 2015 which will allow for the following favourable transition:

- Students repeating the module will cover the same content.
- It will allow an easy transition for students moving from Financial Management 2 (FM202) to Financial Management 3 (FM303) as the same textbook is prescribed.
- Academics at support centres will have more time and opportunity to consolidate the material and prepare for the changeover during the first semester.
- Assessments will be in line with the content and format of previous semesters.

Students will have access to the learner guide, assessment and additional resources on **eLearn**.

The prescribed textbook is:

Gitman, L.J. 2010. *Principles of Managerial Finance*. 1st ed. Pearson.

ISBN:9781770258518 (With calculator guide)

ISBN:9781770255029 (Textbook only. No calculator guide)

There is a second edition (2014) of the prescribed textbook available which is **NOT** required for this module. Should you have problems to find a copy of the prescribed textbook edition, please contact the IMM GSM offices or MindMatters at www.mind-matters.co.za

We trust that this process will assist all stakeholders in implementing the changes to the financial management syllabus. Should you have any academic queries please contact us on academic-ug@immgsm.ac.za

The IMM GSM Team

NOTE:

Refer to eLearn for the document and information summarising the changes to the Financial Management modules and implementation during 2015 - updated December 2014.
